

Senior Security Expertise. A Fraction of the Cost.

Virtual Chief Information Security Officer (vCISO) services from Atlantic Data Security

What is a Virtual Chief Information Security Officer (vCISO)?

An affordable option for organizations seeking to address a wide range of strategic cybersecurity issues, Atlantic Data Security's vCISO program offers access to senior technology leaders in a fractional executive model.

We custom-build vCISO engagements based on your strategic requirements. Scopes of support most commonly include the areas below:

- Security framework assessment and improvement
- Data ownership, classification and planning
- Governance, Risk, & Compliance (GRC) reviews
- GRC program implementation, documentation and improvement
- Incident response and disaster recovery
- Policy creation, documentation and monitoring
- Security audits
- Vendor/partner evaluation and selection

Benefits to Your Team

Ideal for organizations working in multiple industries or that face significant strategic and operational complexity, the vCISO partnership model lets your team maintain focus on operational requirements while our seasoned security executives address your strategic challenges.

- Prevent time-consuming projects from affecting operational output
- Eliminate lengthy executive hiring processes searching for a "unicorn" skillset
- Source experts on any security issue under a single contract
- Lock in costs for senior consultative expertise
- Maintain on-time delivery with ADS's detailed project management framework
- Meet regulatory and industry compliance requirements with industry experts

How Does the vCISO Program Work?

Our goal is to be an extension of your existing IT team, helping you to accelerate your business by partnering to identify and address your information security challenges.

The process begins with a collaboration to discuss your security program's vision and requirements. We then dive deeply into your business culture in order to understand stakeholder concerns, sensitivities, capabilities and business challenges. Our understanding of your internal culture helps us define and deliver the ideal strategic plan to address your requirements.

During delivery, we will work on a qualitatively ranked priority list according to a rolling 30/60/90 day plan that keeps all stakeholders informed via a RACI communications model. At the end of each performance period, we assess progress against your goals and determine any required adjustments.
