DATA SECURITY

OUR MISSION

To provide world-class cybersecurity solutions and services by partnering with our clients to design strategies, build solutions, and run operations.

We are experienced in all critical components of security infrastructure. Our security team is fully trained on all the solutions we represent and able to provide complete configurations, installation, and support.

Our Approach

establishes comprehensive visibility and insight into our client's environment and then leveraging our specialized experts to best match our client's needs

Reach Your Goals

by tailoring our services to each client's unique environment and needs so that we can ensure cybersecurity best practices and align with industry frameworks

Achieve Outcomes

that support our clients business objectives by providing a safe and secure digital environment

Protection, Federated Identity Management,
MFA, RBAC

Endpoint Security and Remote Access

Endpoint Encryption, NAC, BYOD
Enablement, Application Whitelisting, Zero
Day Prevention, Forensics

Cloud Security

CASB, Cloud-Based Security, East/West
Enforcement, Virtualized Firewalls

Server & Database Security

DLP, Data Encryption, Key Management

Risk Management

Compliance, Best Practices, systems
Reviews, Network Visibility & Diagnostics

WHY ADS?

Unlike Traditional IT Manage Service Providers, ADS is dedicated to cyber security consulting and support services.

We have over 25 years of experience helping companies navigate the challenges of cybersecurity. We ensure that we understand your unique environment and business needs so that we can recommend the solutions best suited to solve your problems.

Some providers only offer a subset of security offerings such as monthly support, service desk, and some professional services around hardware asset management and lifecycle.

ADS is security focused, client-centric, and provides high-quality & customizable services.
