Cloud Security Access Broker (CASB)

SUMMARY

A Cloud Access Security Broker, or CASB, monitors data between users and cloud applications. As part of our CASB solutions services ADS will implement and manage a CASB platform to secure your cloud environment, as part of a multi-layered security approach to detect malicious activity and enforce security policies across all cloud services.

FEATURES

Our CASB services are tailored to match your organizations specific needs and priorities to create the most resilient security posture on your environment. (To that end, our CASB services are offered both as a project defined Professional Service or ongoing Managed Services contract.)

- Hardware and Software recommendations to identify the best CASB tool for your security needs and architecture.
- Consultative discussion and analysis to match your priorities and risk profile with the ideal solution.
- Ongoing monitoring of your cloud environment watching for incidents or anomalies.
- Maintenance and troubleshooting of your CASB solution
- Rapid response and remediation to incidents.

SECURE CLOUD USAGE
Cloud systems unique scaling and flexibility capabilities make them key for modern business. Enjoy the benefits of your cloud tools with comprehensive, resilient security

VISIBILITY
You can't see what you can't protect. Our supported CASB solutions provide comprehensive visibility into your cloud environment and ADS' monitoring and reporting services makes this information easily digestible and actionable.

COMPLIANCE
Regulations, cyber-insurance, and industry standards make continuous compliance more critical than ever. Our CASB solutions ensure that your cloud environment is aligned with the necessary rule sets and enable streamlined reporting and auditing.

DATA-SECURITY
ADS' CASB solutions provide rigorous data security in the form of encryption protection, data-loss prevention measure, and more. Enable your employees to use Cloud solutions while maintaining control over your sensitive data.

THREAT-PROTECTION
The threat landscape is constantly evolving and this is particularly crucial in the fast moving world of cloud services. Our CASB solutions ensure that threat actors do not leverage new vulnerabilities to breach your cloud infrastructure
