The modern threat landscape is more dynamic than ever, while organization's IT environments have gotten more complex.

Atlantic Data Security's CTEM Service, powered by Veriti provides clarity and confidence in the uncertain and volatile world of cybersecurity.

By leveraging Veriti's consolidated security platform, we are able to integrate seamlessly into your existing security infrastructure, enabling proactive monitoring for hidden gaps and misconfigurations. We enable objective, data driven visibility across your entire security stack to facilitate a robust security posture and ensure rapid threat prevention

HOW IT WORKS

Atlantic Data Security hosts and manages Veriti's security platform. We handle implementation, establishing a secure connection between your environment and the security platform, ensuring that everything is connected properly and functioning as intended.

Once we have set up the CTEM platform, we continue to provide:

- Ongoing management
- Continuous monitoring
- Vulnerability and misconfiguration identification
- Automatic and manual remediation
- Comprehensive, real-time reporting
- Flexible scalability

ALL-IN-ONE EXPOSURE MANAGEMENT

Atlantic Data Security's Continuous Threat Exposure Management Service provides top tier cybersecurity expertise and technology that is a cost-effective, scalable, and always up-to-date.

Expertise:
Our team of cybersecurity experts ensures smooth, implementation, optimized management, and rapid remediation

Cost-effective:
Our CTEM service offers enterprise-grade security to organizations that cannot feasibly purchase and maintain an in-house solution.

Always up-to-date:
Our CTEM service is always updated with the latest threat intelligence and security features

Scalability:
We can rapidly scale our CTEM services according to your organization's needs without lengthy and costly redesign

24/7 monitoring:
We ensure around-the-clock monitoring of your cyber risk posture, minimizing the risk of threats slipping through
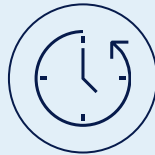

Remediation support:
Rapid, expert led remediation ensure fast resolution and mitigate damage to security threats

PROACTIVE SECURITY

Using automatic Indicator of Compromise capabilities, we streamline the remediation of threats and misconfigurations, keeping you secure around the clock.

MINIMIZED DISRUPTION

We identify and remediate risk in a secure way that is verified not to disrupt critical business operations while resolving incidents and vulnerabilities before they can cause harm.

REAL-TIME INSIGHT

Our non-intrusive assessment process identifies mis-configurations, and vulnerabilities. Our reports allow you to understand your environment and your risk posture.

INTEGRATIONS

VERITI

Veriti revolutionizes exposure management by streamlining approval processes, integrating security controls, and offering efficient remediation through intelligent automation for resilient security defenses without disrupting business operations.
