AUTOMATED SECURITY CONTROLS ASSESSMENT

ATLANTIC DATA SECURITY

powered by **VERITI**

Proactively monitor and remediate security gaps and misconfigurations across your security stack, without sacrificing business uptime.

ACHIEVE THE CYBER CERTAINTY YOU'VE BEEN SEEKING

Cybersecurity is a never-ending battle against the unknown. We keep finding ourselves continuously investing in new security tools, relentlessly seeking that elusive sense of certainty. But until now, certainty has remained nothing more than a fleeting sensation.

The nagging question persists: Are we truly protected?

Atlantic Data Security provides unparalleled security controls assessment tool that empowers you to take charge of your organization's security within minutes. Leveraging Verit's consolidated security platform, our service seamlessly integrates with your existing security infrastructure, enabling proactive monitoring for hidden gaps and misconfigurations across the entire security stack that could undermine your security posture or disrupt critical business operations. With Atlantic Data Security, you can move beyond subjective assessments and embrace data-driven security measures, ensuring unwavering confidence in your resiliency.

MAKE INFORMED DECISIONS

Atlantic Data Security arms you with precise insights generated minutes after first installed, and actionable non-disruptive remediation paths, enabling you to make informed decisions to fortify your defenses. By unifying all security configurations to a single, comprehensive language, we provide complete visibility into your risk posture, security gaps, and array of available countermeasures. Using machine learning, we automatically analyze all configurations and correlates them with telemetries, security logs, and threat intelligence feeds to generate contextual, actionable insights tailored for the relevant security teams.

THE VALUE PROPOSITION

COMPREHENSIVE VISIBILITY
into all vulnerabilities and misconfigurations within the security infrastructure.

ONE-CLICK REMEDIATION. ZERO BUSINESS IMPACT
Leveraging machine learning and business-impact prediction models to close security gaps with zero business downtime.
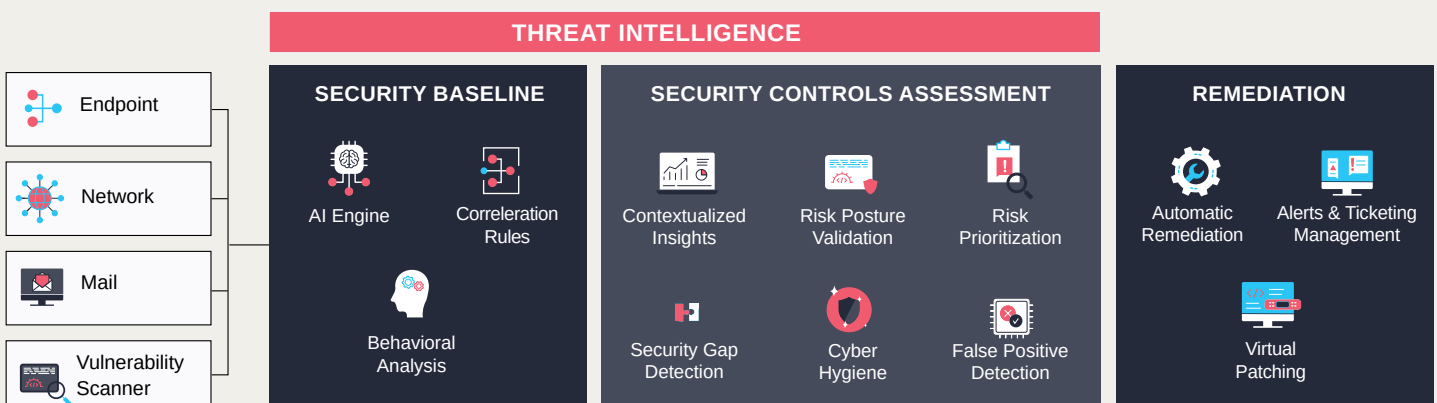

ACTIONABLE INSIGHTS WITHIN MINUTES
by continuously analyzing your security controls, Veriti generates data-driven insights that simplify investigations and dramatically reduce MTTR.

OPTIMIZE RESOURCES
Maximize security efficiency with automated assessment and advanced security control optimization capabilities.

THREAT INTELLIGENCE

Endpoint	SECURITY BASELINE	SECURITY CONTROLS ASSESSMENT	REMEDIATION
Network	AI Engine	Contextualized Insights	Automatic Remediation
Mail	Correleration Rules	Risk Posture Validation	Alerts & Ticketing Management
Vulnerability Scanner	Behavioral Analysis	Risk Prioritization	Virtual Patching
		Security Gap Detection	
		Cyber Hygiene	
		False Positive Detection	

SEAMLESS AND AGENTLESS ASSESSMENT

Effortlessly optimize your security controls with Atlantic Data Security's seamless and agentless assessment. Our non-intrusive assessment process empowers you to easily identify misconfigurations, understand their root cause, and fortify your clients' defenses for comprehensive security enhancement. Continuously.

PROACTIVE MONITORING

Harness the power of your security solutions' native APIs to continuously monitor your security configurations. By meticulously analyzing and correlating them with security logs intelligence feeds and other validation solutions, our service identifies potential vulnerabilities, misconfigurations, and emerging threats and let you take non-disruptive actions to rectify them before they are exploited.

VULNERABILITY MITIGATION

Atlantic Data Security goes beyond detection by offering comprehensive vulnerability mitigation capabilities. Our service helps you prioritize critical vulnerabilities and provides actionable insights for effective mitigation strategies. By leveraging Veriti's virtual patching and non-

disruptive remediation capabilities, you can ensure that your infrastructures remain secure and compliant, safeguarding your most valuable assets.

FALSE POSITIVE AND BUSINESS IMPACT EVENT DETECTION

Leveraging Veriti's advanced analytics, Atlantic Data Security accurately distinguishes false positives and identifies events with potential business impact. Make informed decisions and implement effective risk mitigation measures while ensuring minimal disruption and maximum security.

ACTIONABLE INSIGHTS AND EFFICIENT RESPONSE

Utilize Atlantic Data Security's comprehensive reports and actionable insights to gain a clear understanding of your organization's security posture and vulnerabilities. Swiftly respond and efficiently manage your entire security stack with a proactive and adaptive approach. We provide you a strategic roadmap with a clear path towards enhanced protection, ensuring peace of mind for your organization.
